- Fungal infection

Treatment

Marigold Therapy is a research based medicine which provides gentle, effective treatment for foot problems.

Marigold Therapy is an integral part of homeopathic podiatry, comprising of specially formulated medication applied topically in conjunction with conventional podiatry treatment.

Quick acting and without adverse reactions, Marigold Therapy is suitable for people of all ages. Its gentle, non-invasive nature makes it attractive to patients and helps to remove even the youngest patient's fear of treatment. It is also helpful for people for whom surgery is contra-indicated.

Patients attend the Marigold Clinic once a week for 2-4 weeks, according to the condition being treated. This is followed by a simple treatment regime at home.

Extensive experience has shown that beneficial long term results are achieved for many patients.

Oral low potency homeopathic medicines, and/or biochemic tissue salts, are prescribed where indicated.

No animals are used in the manufacture of Marigold Therapy preparations.
